Following races counts for the ace pigeon competition:

- Zafra 125km
- Merida 180km
- Cacerec 240km
- Jarilla 320km
- Santovenia 510km

The ace points are calculated after the FCI formula who gives a coefficient for each result.

The lower coefficient the better.

All registered pigeons within the 2nd day at 20:00 counts for ace-pigeon points.

Example:

Distance:	320km
Amount of pigeons:	1850
Result pigeon A:	39th place

Ace points = (place x 1000) / (distance x amount of pigeons)

Ace points for pigeon A = $(39 \times 1000) / (320 \times 1850) = 0,06587$

Points will be accumulated for each race and the pigeon with the lowest coefficient after final race will win.

Sevilla Champions League – the best team in Sevilla Pigeons Race:

This is an additional team competition all paid teams (450€ per team) automatically is qualified for. That means that all paid teams consisting of 6 pigeons (3 active + 3 reserves) count for the competition. Reserve pigeons also count for points until semi-final.
